

SAML 2.0 Attribute Profile

FOR THE FINNISH PUBLIC SECTOR

Version	Date	Changes
1.0	8.12.2010	Implementation by Ubisecure Solutions, Fujitsu Services and CSC — IT Center for Science. Approved by Ministry of Finance and Ministry of Employment and the Economy.
1.1	21.2.2011	New attribute to indicate the Authentication Provider.

This is the attribute profile specification for the Finnish public sector identity federation services, such as VETUMA, tunnistus.fi and Virtu. This document defines the syntax and semantics of the attributes which are common to all identity federation services. This document may be supplemented in the service-specific documentation.

Tunnistus.fi and VETUMA are two citizen authentication services in the Finnish public sector. Virtu is an identity federation for authentication of the civil servants in the Finnish state government.

electronicIdentificationNumber (satu)

Description	The electronic identification number (sähköinen asiointitunnus, satu) issued to an individual by Population Registry Center (Väestörekisterikeskus).
Intended use	Identification of an end user
